

# VALUABLE OBJECTS TO SELL

From your INVENTORY WORKSHEET, list items you categorized as "SELL" on the lines below.

For each item, list as much of the following information you can gather.

- a. Brand of the item
- b. Model and/or Serial #s where applicable
- c. When you purchased the item (month and year) and from where
- d. If you purchased the item new or used
- e. How much you paid for the item

Based upon the value of the item, consider researching similar products online at sites like eBay, Amazon, or auto sites like KellyBlueBook.com to better understand the value of your item. Different values can help you determine how best to sell your item whether through an estate sale, online retailer, auction, etc. Or, maybe you'll find donating your item to Goodwill and taking the tax write-off is the best bet. I mean, it's always possible no one really wants that antique bookshelf. Then again, one man's trash is another man's treasure!
